AUTHOR INDEX

VOLUME 50

Aaronson, Robert P., 118
Abidi, Tanveer F., 380
Adachi, Akio, 813
Adler-Storthz, Karen, 951
Allen, Rae, 748
Anders, E. Margot, 960
Anderson, Carl W., 387
Anderson, Dwight L., 766
Anderson-Sillman, Kathleen, 922
Arbuthnott, Carolyn, 725
Arias, Carlos F., 657
Arlinghaus, Ralph B., 478
Astry, Calvin L., 287
Austin, M., 684
Avery, Roger J., 439

Babiss, Lee E., 202
Bamford, Dennis H., 309
Bartal, Sharon, 922
Batterson, William, 645
Baumann, Ernst, 943
Baumann, Raymond P., 13
Bayley, Stanley T., 30
Bell, John R., 657
Bellini, William J., 939
Bernards, René, 847
Berns, Anton, 432
Bikel, Ilan, 623
Billiau, A., 878
Bina, Minou, 471
Biron, Christine A., 698
Bishop, J. Michael, 125, 280
Bjornsti, Mary-Ann, 766
Black, Lindsay W., 293
Blenis, John, 966
Block, W., 408
Blomberg, Jonas, 796
Boeiens, Wilbert, 432
Branton, Philip E., 30
Braun, Daniel K., 645
Brody, Edward, 191
Brown, Nicole V., 478
Buckmaster, A., 547
Burghoff, Robert L., 662
Burns, John W., Sr., 951
Burny, Arsène, 275
Burroughs, J. N., 878
Butel, Janet S., 636

Cabradilla, Cirilo D., 773
Capobianchi, Maria R., 964
Carter, Jeanne K., 301
Cattaneo, Roberto, 335
Caughman, Gretchen B., 13
Cave, David R., 86
Champness, Wendy Cooley, 555
Chartrand, Pierre, 678
Chesebro, Bruce, 359
Chinsky, Jeffrey, 271
Churcher, Mark J., 838
Clark, Stephen P., 759
Clarke, B. E., 878
Clewley, Jon P., 439
Coffin, John M., 397
Coggins, Lesley, 725
Collen, D., 878
Collett, Marc S., 666
Concannon, Patrick, 654
Consigli, Richard A., 77
Cook, Frank, 439
Copeland, Neal G., 237
Cordingley, Mike G., 708
Couez, Dominique, 275
Crawford, Lionel V., 457
Creager, Richard S., 118
Cuypers, Theo, 432

Darby, Graham, 838
Dasgupta, Asim, 515
Dauenhauer, Steven A., 13
Davatelis, Viveca, 445
Davison, John, 629
Delange, A. M., 408
de Leeuw, Mike G. W., 847
Deschamps, Jacqueline, 275
Desrosiers, Ronald C., 662
Dianzani, Ferdinando, 964
Doerfler, Walter, 497
Dohner, Dennis E., 615
Dorner, Andrew J., 507
Dowbenko, Donald, 579
Downey, James F., 30
Dreesman, Gordon R., 951
Dubensky, Thomas W., 541, 779
Duprey, Elizabeth, 507

Ebeling-Keil, Angelika, 784
Eberle, R., 316
Echle, Birgit, 1
Edelstein, Brian, 904
Ellman, Matthew, 623
Emerman, Michael, 42
Emerson, Suzanne Urjil, 255
Enders, Lynn D., 947
Englund, George, 939
Epstein, Alan L., 372
Erikson, R. L., 966
Ernoult-Lange, M., 163
Ertl, Hildegund C. J., 425
Evelegh, Carole M., 30
Eydelloth, Ronald S., 947

Facchini, Jole, 964
Faras, Anthony J., 465
Faulkner, Peter, 739
Feng, Mei-Fu, 56
Ferrer, J. F., 267
Fields, Alan, 145
Figge, James, 623
Finberg, Robert W., 425
Fischer, Duncan K., 822
Flanagan, Thomas D., 380

SUBJECT INDEX

VOLUME 50

2-5A
  interferon
    vaccinia virus, 220
  vaccinia virus
    interferon, 220
Active transport
  bacteriophage T5, 671
Acyclovir
  herpes simplex virus resistance loci, 838
Adenovirus 2
  Ad2*ts*111
    defective viral DNA replication, 598
    degradation of cellular DNA, 598
    independent mutations, 598
  early region 1B
    coterminal proteins, 387
  early region 4
    mRNA splice junctions, 106
  oncogenicity
    transforming region, 847
  transforming region
    oncogenicity, 847
Adenovirus 12
  early region 1A
    bacteria, 895
    early region 1A–β-galactosidase fusion protein antigen, 895
    monospecific antiserum, 895
  E1 gene
    soft-agar colony-forming rat cell lines, 854
    transformed rat cell lines, 854
  E4 gene
    soft-agar colony-forming rat cell lines, 854
    transformed rat cell lines, 854
  rat cell lines
    E1 gene, 854
    E4 gene, 854
    soft-agar colony-forming, 854
    transformed, 854
Adenovirus 5
  early region 1A
    adenovirus 12 early region 1A–β-galactosidase fusion protein antigen, 895
    monospecific antiserum, 895
  early region 1B
    gene product, 202
    shutoff of host protein synthesis, 202
Adenovirus 7
  simian virus 40-adenovirus 7 hybrids
    simian virus 40 large T antigen, 636
Adenoviruses
  early region 1
    integration of viral DNA, 606
  eucaryotic cells, 606
  helper-independent recombinant
    early region 1, 606
    eucaryotic cells, 606
    integration of viral DNA, 606
Aleutian disease virus
  low virulence
    royal pastel mink, 38
Alphavirus
  abortogenic
    in utero infections, 66
    mice, 66
  immunity
    mice, 73
  mice
    immunity, 73
    in utero infections, 66
    pregnancy, 73
  non-abortogenic
    in utero infections, 66
    mice, 66
Antibodies
  monoclonal
    Epstein-Barr virus, 372
    Fujinami avian sarcoma virus, 572
Antigens
  cellular tumor p53
    simian virus 40 large T, 457
  early
    Epstein-Barr virus, 372
  fusion protein
    adenovirus 12 early region 1A–β-galactosidase, 895
  hepatitis B surface
    cultured murine cells, 563
    gene transcription, 563
    presurface region, 563
  hepatitis B virus
    simian virus 40 vector, 335
  large T
    polyomavirus, 587
    simian virus 40, 1, 457, 636
  mouse lymphocyte
    endogenous xenotropic murine leukemia virus, 237
  mutant T
    simian virus 40-transformed human cell line simian virus 80, 943
  neutralization
    simian rotavirus SA11, 657
  nuclear
    Epstein-Barr virus, 822
  small T
    simian virus 40, 623
  T
    K virus, 954
    mutant, 943
Autographa californica
  nuclear polyhedrosis virus
    early transcripts, 497
    late transcripts, 497
    transcripts, 739
Avian infectious bronchitis virus
  genome
    coronavirus multiplication, 22
    virion protein genes, 22
Avian leukemia virus
  E26
    gag genes, 280
    myb genes, 280
    neoplastic transformation, 280
Avian leukosis virus
  hyperlipidemia, 301
Avian paramyxovirus
  genomic analysis, 649
  immunological analysis, 649
  Japan, 649
  wild ducks, 649
Avian retrovirus
  endogenous
    nonpermissive chicken embryo fibroblasts, 748
    permissive chicken embryo fibroblasts, 748
    replication, 748
Avian sarcoma virus
  PRCII strain
    v-*fps* nucleotide sequence, 125
  recovered
    induction of tumors, 904
    mapping of deletions, 904
    src deletion mutants, 904
  reverse transcription in vitro
    strong-stop plus DNA synthesis, 465
  RNA primer
    strong-stop plus DNA synthesis, 465
  strong-stop plus DNA synthesis
    reverse transcription in vitro, 465
    RNA primer, 465
Avian sarcoma virus UR2
  characterization, 914
  molecular cloning, 914
  transforming sequence, 914

Bacteriophage
  ϕ29
    in vitro DNA-gp3 packaging, 766
  ϕW-14
    DNA synthesis, 529
    mutants, 529
    polypeptide synthesis, 529
  ϕX174
    regions of incompatibility, 533
    single-stranded DNA, 533
  G4
    regions of incompatibility, 533
    single-stranded DNA, 533
  λ-T4 hybrid
    thymidine kinase, 619
    T4 thymidine kinase gene, 619
  PRD1
    DNA protein complex, 309
  T4
    antipolarity, 191
    early transcription units, 191
    gol site, 555
    in vivo encapsidation of DNA, 293
    plasmid transformation, 555
    temporal heterogeneity, 191
    thymidine kinase gene, 619
    UV irradiation, 293
  T5
    alteration of active transport, 671
    direction of transcription, 629
    first-step transfer DNA, 629
Bovine leukemia virus
  cattle, 267
  genome
    transcriptional control, 267
  non-immunoglobulin plasma protein, 267
  provirus
    tumors, 275
  tumors
    provirus, 275
Bovine viral diarrhea virus
  proteins, 666

Calcium
  entry blockers
    gamma interferon, 964
Capsids
  simian virus 40 temperature-sensitive BC mutants
    chromatin, 471
Cattle
  bovine leukemia virus, 267
Cells
  B
    influenza virus, 960
  COS-1
    Epstein-Barr virus nuclear antigen, 822
  cultured murine
    hepatitis B surface antigen, 563
  eucaryotic
    helper-independent recombinant adenoviruses, 606
  hamster
    polyomavirus large T-antigen, 587
  hamster embryo
    lymphotropic papovavirus, 100
    transformation, 100
  human neural
    measles virus replication, 489
    papaverine, 489
  human nonneural
    measles virus replication, 489
    papaverine, 489
  mammalian
    herpesvirus DNA molecules, 248
  monkey
    simian virus 40, 623
  mouse
    simian virus 40, 623
    transformed, 954
  mouse kidney
    cytoplasm, 77
    monopinocytotic vesicles, 77
    polyomavirus, 77
  natural killer
    lymphocytic choriomeningitis virus, 698
  NIH/3T3
    Kirsten murine sarcoma virus, 439
  pancreatic beta
    Mengovirus, 684
    mice, 684
  rat
    adenovirus 12, 854
    soft-agar colony-forming, 854
    transformed, 854
  simian virus 80
    mutant T antigen, 943
  T
    clones, 425
    influenza virus, 960
    Sendai virus, 425
  transformed mouse
    K virus, 954
  Vero
    herpes simplex virus glycoproteins, 258
Chickens
  endogenous avian retrovirus
    nonpermissive embryo fibroblasts, 748
    permissive embryo fibroblasts, 748
  nonpermissive embryo fibroblasts
    endogenous avian retrovirus, 748
  permissive embryo fibroblasts
    endogenous avian retrovirus, 748
Chromatin
  simian virus 40 temperature-sensitive BC mutants
    capsids, 471
Coliphage
  T5
    DNA ejection process, 213
    free TonA protein, 213
    liposome-associated TonA protein, 213
    TonA protein, 213
Coronavirus
  avian infectious bronchitis virus genome
    multiplication, 22
    virion protein genes, 22
  multiplication
    avian infectious bronchitis virus genome, 22
    virion protein genes, 22
  virion protein genes
    avian infectious bronchitis virus genome, 22
    multiplication, 22
Cowpea mosaic virus
  bottom-component RNA
    32,000-dalton protein, 183
    proteolytic processing enzyme, 183
  32,000-dalton protein
    bottom-component RNA, 183
    proteolytic processing enzyme, 183
  proteolytic processing enzyme
    bottom-component RNA, 183
